

Our company understands the growing global market and our customer's changing needs.

Our goal is to add value to our client's businesses. Let us help you complete your most challenging projects.

With every project, there are unique challenges and requirements, which is why we develop customer-specific assembly procedures to meet distinctive customer specifications.

Documented procedures and guidelines are executed by highly trained technicians on validated equipment.

Numerous projects require specialized equipment, and Northeastern Assembly has the capabilities to integrate customer-supplied equipment or design, develop and validate customized equipment to meet our customers' needs.

**Flexible Production
Environment**
For Assembly, Packaging & Distribution

Global Manufacturing
Solutions with Local Services

Northeastern Assembly Inc., specializes in the production and assembly of medical and government devices, & consumer goods, pick & pack, fulfillment, customized production, packaging, distribution, rework and quality inspections.

Onshoring Specialist With Global Reach

Our in-house systems and network of manufacturing partners allows us to create effective sourcing options and a better business strategy.

THE NEW AMERICAN ECONOMY

Northeastern Assembly Inc. is a leader in onshore manufacturing. With a full in-house manufacturing system that includes clean room controlled production areas and climate controlled storage, Northeastern Assembly capitalizes on the increasing trend of onshore manufacturing and effectively utilizes local resources.

We are committed to our partnerships with local vendors and suppliers to offer a “one stop shop” for clients looking to participate in the movement of onshoring.

NEA supports quality American-made products by specializing in the customer-specific assembly of medical, government, and consumer goods devices and components.

FLEXIBLE ENVIRONMENT

Our flexible production environment can quickly accommodate customer needs, with specialized equipment and procedures performed by technicians trained on specific client protocols.

We offers services that include in-house manufacturing, assembly, pick and pack, packaging and labeling, custom kits, fulfillment, patent protection, salvage and rework, and more.

Northeastern Assembly Inc. follows ISO 9001, AS9100, and ISO13485 processes for the assembly of a wide variety of products, from small quantities of samples and pre-production units to large quantity units. By offering our clients connections to the US and global markets, we optimize processes, support, plan, and develop strategies for success and profitability.

We use our US based and overseas facilities to create the most cost effective solutions for your business.
American Quality. Onshore Service with Offshore Pricing.
